Skills

JavaScript

Fluent with Javascript, specially with **NodeJS** acquired both in my free-time and in my jobs experiences. Also worked with Express, Mocha, JQuery and other many JavaScript libraries and frameworks.

C/C++

Strong background with C and C++ as I have been using it successfully every semester at university in all kinds of subjects like Computer Networks, Operating Systems, Data Structures and Algorithms, Computer Architectures, etc.

Security

Have done several **penetration tests** in real systems and environments finding critical vulnerabilities. Aware of majority and most important security flaws and I love to prove the security of every system. Always write code with good security practices in mind.

Databases

Worked a lot with **MongoDB** databases, optimizing queries, designing Models Schemas, and configuring the DBs. Also worked too with relational databases (PostgreSQL and MySQL) designing and administrating them.

Other skills

Agile methodologies. Knowledge sharing. Teamplayer and cooperative. Effective communication. Self-learner and entrepreneur. Creative and innovative. Flexibility and adaptability.

Languages

Excellent with **Spanish, Catalan** and **Romanian**. Fluent with **English**.

Basic with **French** and **Russian**.
